DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

NITK-SURATHKAL

Sub: Network Security

Lab assignment No.4

1. Implement JWT Authentication protocol. Analyze its security under following common JWT attacks.
   a) None Algorithm Attack
   b) Secret Key Brute Force
   c) Token Replay
   d) Expiry Not Checked
   e) Storing in Local Storage.

2. Implement the WebAuthn authentication protocol. Compare symmetric vs asymmetric authentication cost.
